

THE VILLAGE AT ASPEN PLACE

Flagstaff, Arizona

- Coreslab provided early design assistance on this 5-story, 315 stall parking structure for retail and private residential user groups.
- On the two exposed sides of the parking structure, the designers specified a "board form" finish with "fractured fin" joints out of gray concrete.
- 3-hour fire separation walls were used adjacent to the adjoining 222 luxury apartments and 30,000 S.F. of retail.

"Based on Coreslab's performance on this project, I am confident in recommending Coreslab as a full-service precast contractor of choice to fit a challenging design, fabrication and construction schedule on any project."
