

NORTH MOUNTAIN INTEGRATED MEDICAL SERVICES

Phoenix, Arizona

- Integrated Medical Services chose a total precast concrete structure over tilt-up and steel because of the lower building cost and speed of construction.
- The exterior precast wall panels combine structural load-carrying capability in conjunction with providing the aesthetic characteristics to attain the Architect's original vision for the project.
- The inherent durability of a total precast concrete structure translates into significant dollars saved in maintenance costs and the fire resistive characteristics of precast concrete will reduce insurance premiums over the life of the building.

Owner: Integrated Medical Services

Architect: DAVIS

Engineer: PK Associates, LLC

General Contractor: IBC Southwest, Inc.
