

McCARRAN OFFICE BUILDING

Las Vegas, Nevada

Architect: Howard F. Thompson Associates

Engineer: STB Structural Engineers, Inc.

General Contractor: Kalb Construction Company

- The developer of this corporate office building chose a total precast concrete structure over tilt-up and steel because of the lower building cost and faster construction.
- The architect used the versatility of precast concrete to accent the building with monolithically cast bull nose, ledge and cornice details.
- This project consists of 120,000 SF on 4 levels and was erected in 8 weeks, including stair and elevator walls.
