

PAPAGO CORPORATE PARK

Phoenix, Arizona

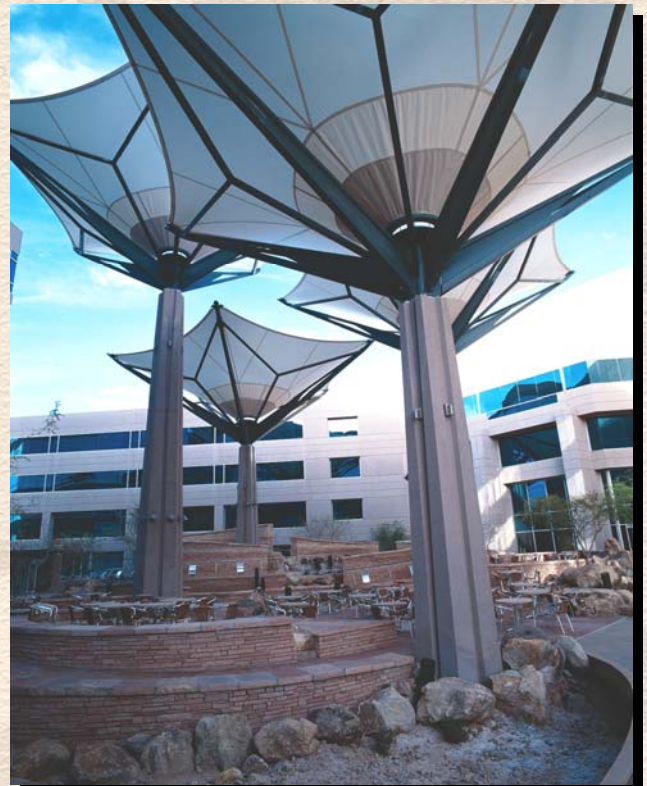

Architect: DAVIS

Engineer: Caruso•Turley•Scott, Inc.

General Contractor: Ryan Companies, U.S.

- Architectural precast spandrels and column covers were designed 4½" thick with ¾" deep reveals. The thin panels reduced the loads on the structure and lowered the cost of the building.
- The architectural concrete mix includes aggregates from California and a color pigment that accents the window system.
- Architectural precast canopy columns provide a unique feature to the courtyard.
