

John C. Lincoln Deer Valley Employee Parking Garage

Phoenix, Arizona

- This parking structure is a 7-story, 340,200 SF total precast parking structure, and parks 1,050 cars.
- Coreslab was brought in early in the design of the project which enabled us to control the geometry and capture the cost efficiencies associated with using standard components
- Despite the extremely "tight site" conditions and ongoing hospital services, Coreslab was able to complete the construction from within the structure footprint in just 40 days minimizing the disruption to the hospital.

Owner: John C. Lincoln Health Network

Architect: Kracor, Inc.

Engineer: Paragon Structural Engineers

Contractor: Kitchell Contractors
