

NAU SAN FRANCISCO PARKING STRUCTURE

Flagstaff, Arizona

- High performance precast concrete was the solution of choice for this 6 story, 1400 car parking structure for Northern Arizona University.
- It is resilient, durable, and aesthetically appealing with brick clad panels on the lower levels.
- The parking structure was finished 3 months ahead of schedule and overall under budget.

"I wanted to take a moment and express my pleasure on Coreslab's completion of the 1,400 space parking structure at NAU. We were able to finish 3 months ahead of schedule and overall under budget mostly to Coreslab's efforts."

John P. Carter, Senior Project Manager
Ryan Companies, US, Inc.

Owner: Northern Arizona University

Architect: Todd & Associates, Inc.

Engineer: Caruso•Turley•Scott, Inc.

Contractor: Ryan Companies U.S. Inc.
