

SCOTTSDALE QUARTER PARKING DECK J

Scottsdale, Arizona

- The unique façade of this parking structure incorporates architectural precast concrete which compliments the many façade treatments.
- The long span capabilities of precast concrete allowed for the retail areas to be designed column free.
- Precast concrete met the Architect's challenge of specifying a material that could provide a large open structure that would also accent the surrounding development.

Owner: *Macerich*

Architect: *Nelsen Partners*

Engineer: *Desman*

General Contractor: *The Whiting Turner Contracting Company*
