

W. L. GORE PARKING STRUCTURE

Phoenix, Arizona

Owner: W. L. Gore Associates

Architect: Reece, Angell, Rowe Architects

Engineer: Caruso Turley Scott, Inc.

Contractor: Ryan Companies US, Inc.

(Central Cooling Plant and Solar Panel Platform)

Fabric

➤ Coreslab provided design assistance for this 3-level, 400 stall parking garage which included a central cooling plant within the parking structure which also supported a rooftop platform for solar panels.

➤ Coreslab participated in weekly collaborative design meetings with the team, including BIM reviews which served to mitigate clashes and constructability issues.

Building 1

➤ For the exterior architectural precast columns and spandrels, the architect chose integral color and a medium sandblast texture. The spandrels included a simple reveal and minor recessing to achieve the look which was framed nicely by the structural precast shear walls which received a brick veneer in the field.
