

FGCU PARKING GARAGE 1

Ft. Myers, Florida

Architect: Schenkel Schultz Architects

Engineer: Walker Parking Consultants

General Contractor: Ajax Building Corporation

- Precast shapes should be as repetitious as possible. Through repetition, the expense of the form can be amortized to the point of adding little square footage cost to the element.
- Fabrication economy is determined primarily by the extent of casting repetition and by the piece sizes. On this project multiple copies of the same piece added to the efficiency of construction and the overall economy of the structure.
