SARASOTA MEMORIAL HOSPITAL GARAGE

Sarasota, Florida

- This 7 story garage used single piece columns and litewalls as tall as 76’-0” to reduce the number of pieces on the project, thus reducing erection costs.
- The exterior façade that was supplied was a smooth form finish structural panel with the upper panels using a diamond pattern form liner and the lower panels using a ¾” horizontal reveal.

Architect: Barger Dean

Engineer: Sterling & Wilbur

General Contractor: WG Mills Construction
